(54) CAR NAVIGATION SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To automatically adjust a voice uttered to the outside to a sound volume requested by a user in a car navigation system equipped with a voice generation device.

SOLUTION: When the user pronounces a 'sound-volume setting command', its sound volume is detected, and output sound-volume data corresponding to the sound volume is stored. When a voice used to guide a route or the like is output from a loudspeaker, the magnitude of the voice is adjusted to a
